NETs Action Plan: English Day

Science World

(Version 2)

On 30th March, 2023, our school conducted English Day with a STEM focus. It aimed at stimulating students' interest in learning English and STEM through the application of scientific knowledge in daily life. The event was a great success, with engaging activities that helped students understand scientific concepts and left them inspired to pursue science in the future.

Science Experiments

Primary 1 and 2

Making airplanes with different materials

Primary 1 and 2 learned how to make airplanes with different materials and tested which materials could make the airplanes fly the farthest.

Primary 3 and 4

Making floating boats

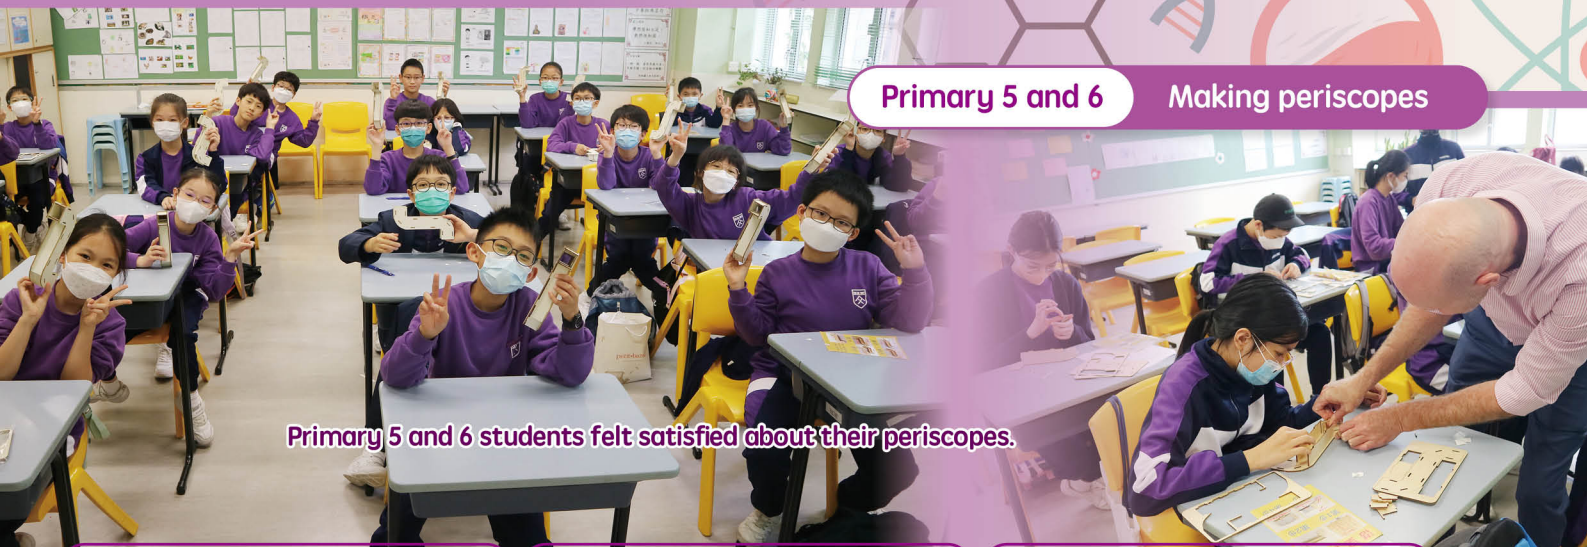

Primary 3 and 4 students made their own boat design with aluminum paper. Then they put their boats to the test on water.

Primary 5 and 6

Making periscopes

Primary 5 and 6 students felt satisfied about their periscopes.

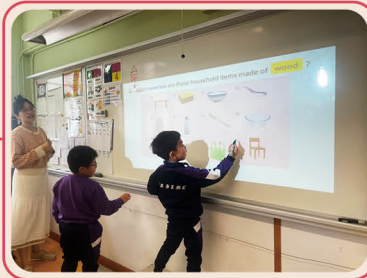

NETs taught Primary 5 and 6 students how to make periscopes.

General Science Knowledge Quizzes

Our English teachers played some interactive games to test various science knowledge.

Students excitedly embraced the opportunity to absorb new science knowledge.

Science Magic Show

A magician brought students up on stage for mind-bending magic tricks. The magic show was so captivating that our students were so eager to take part in it!
